

The mission of the Georgia Technology Authority is to deliver secure, reliable technology services and solutions, and provide guidance and oversight that lead to sound decisions for Georgia government.

GTA has developed seven strategies for achieving our mission:

1. Use IT to facilitate agency collaboration.
2. Protect the state's infrastructure.
3. Improve access to government information and services while ensuring privacy.
4. Improve IT decision-making, investments and implementation.
5. Increase agencies' productivity by delivering reliable technology services.
6. Support a resourceful and productive workforce.
7. Improve internal processes.

### **Working with government to improve services and efficiency**

GTA works with government to develop strategic plans and facilitate sharing technology and information. Major activities include:

- operating Georgia's new enterprise portal, [www.georgia.gov](http://www.georgia.gov), which offers quick and easy access to government information and services, including online business registration;
- overseeing information system projects costing more than \$1 million to prevent waste and delay;
- upgrading and modernizing the state's telecommunications infrastructure;

- modernizing the state's computing environment;
- strengthening the security of the state's computer and information network; and
- reviewing and analyzing IT budgets and strategic plans.

### **Organization**

- Executive director and state chief information officer, Tom Wade
- Positions 695
- Amended FY 2005 budget - \$194.4 million
